1.0 EXECUTIVE SUMMARY

- 1.1 This supplementary report should be read in conjunction with the v7 version of the Epping Forest District Council Civic Building and Offices Tender Report dated 29 April 2020 which details the original tender process and recommendation for Epping Forest District Council Civic Building and Offices Project.
- 1.2 Following a robust review by the client team of the original, compliant ISG Fit Out Ltd tender received 3 April 2020 as detailed in the tender report dated 29 April 2020; it was the team's recommendation that the contract should be awarded to ISG Fit Out Ltd in the Contract Sum of £5,408,630.00 (excl. VAT). This recommendation was arrived at through the use of a balanced scoring matrix that included both a cost and technical evaluation. Please refer to the previous report for the evaluation undertaken.
- 1.3 Following their original submission, ISG Fit Out Ltd were requested to submit a revised tender, one which fully considered the impact of COVID-19 upon their programme and costs. This tender was submitted on 4 May 2020 and was evaluated by Gardiner & Theobald as detailed in Section 3.0 of this report.
- 1.4 The cost uplift from ISG Fit Out Ltd was in the sum of **254,432.00**. This was primarily due to the following factors:-
 - Increased programme of 6 weeks incurring additional preliminaries
 - Requirement of out of hours working
 - Introduction of safety measures to ensure compliance with COVID-19 Site Operating Procedures
- 1.5 Following a review of the revised financial offer from ISG Fit Out Ltd in conjunction with the technical evaluation carried out previously, it is the team's recommendation that the contract should be awarded to ISG Fit Out Ltd in the Contract Sum of £5,663,062.00 (excl. VAT).
- 1.6 Furthermore, the report also considers residual risk items, as set-out within section 4.0. To mitigate the risk items, it is recommended that a Construction Contingency of £605,000.00

is retained against the Construction Project. This is a decreased contingency level from the previous report now a revised tender has been submitted which considers the risk of COVID-19. However, there remains a residual risk that the ongoing pandemic could still have an impact on the project.

- 1.7 The main residual risks that have been identified that will require the project team to work closely with ISG include:-
 - Rejection of additional Listed Building Consent Application.
 - Timely liaison and consultation with Planning Authority.
 - Agreement of contract amendments.
 - Potential enhanced conditions put in place by Government on Covid-19.
 - Co-ordination of client-led packages.

Further details towards each of the residual risks are included under Section 4.0 of the report.

- 1.8 Placing an order with ISG in the value of £5,663,062.00 (excl. VAT) and retaining a Contingency of £605,000.00 results in an underspend of £224,808.00 against the approved budget of £6,875,000.00. Owing to the ongoing situation regarding COVID-19 we recommend that the underspend is retained as a client reserve as a further contingency to cover construction risks that are not considered within the Construction Contingency. Please see Appendix A for a full breakdown.
- 1.9 In summary, these next steps are required to take the project forward.

| Action | Required by |

| a decision is to be made on whether Project is to proceed at | 01/06/2020 |
| Council Meeting. | |

2.0 INTRODUCTION

- 2.1 The aim of this tender report is to update the process of procuring a Principal Contractor to undertake the design and construction of works entitled 'Civic Building and Offices', on behalf of Epping Forest District Council. The report will review the extended tender process, the analysis of ISG Fit Out Ltd.'s revised tender return and the subsequent evaluation which has led to an appointment recommendation.
- 2.2 Following a robust review by the client team of the original, compliant ISG Fit Out Ltd tender received 3 April 2020 as detailed in the tender report dated 29 April 2020; it was the team's recommendation that the contract should be awarded to ISG Fit Out Ltd in the Contract Sum of £5,408,630.00 (excl. VAT). This recommendation was arrived at through the use of a balanced scoring matrix that included both a cost and technical evaluation. Please refer to the previous report for the evaluation undertaken.
- 2.3 Following their original submission, ISG Fit Out Ltd were requested to submit a revised tender, one which fully considered the impact of COVID-19 upon their programme and costs. This tender was submitted on 4 May 2020 and was evaluated by Gardiner & Theobald as detailed in Section 3.0 of this report.

3.0 REVISED TENDER PROCEDURE AND EVALUATION

- 3.1 Please refer to previous report dated 29 April 2020 for a full summary of the original tender procedure. This report supplements the aforementioned report and details the process for the revised tender submitted by ISG Fit Out Ltd.
- 3.2 On the 16th April 2020 a conference call was held between Epping Forest District Council, Gardiner & Theobald and ISG Fit Out Ltd to discuss their original tender. During that conference call, ISG Fit Out Ltd were asked to submit a second tender offer, one that fully considered the impact of COVID-19 within their programme and cost.
- 3.3 This second, revised tender was received on 4th May 2020 as agreed between Epping Forest District Council and ISG. The opened, unaltered tender return compared to their original reconciled tender from Section 4 was as follows:-

| Tendering Contractor | Tender Value |
|-------------------------------|---------------|
| ISG Reconciled Tender | £5,408,630.00 |
| | |
| ISG Revised Tender – COVID-19 | £5,663,062.00 |
| | |
| Cost Uplift | £254,432.00 |

- 3.4 Upon receipt the tender was arithmetically checked and no errors were identified.
- 3.5 ISG submitted no further qualifications within their revised submission.
- 3.6 We summarise the key observations made against an initial review of the revised tender:-
 - Practical completion extended to 29/01/2021 against the previous date of 18/12/2020, an extension of 6 weeks.
 - Cost uplift of £104,327.50 for additional staff preliminaries for the extended programme.

- Sub-Contractor preliminaries of £47,790.00 for increased programme duration. This has been distributed on a pro-rata basis across the works packages in the tender analysis in Appendix B
- Additional costs of £60,773.70 in order to make the Contractor's site Accommodation compliant with COVID-19 restrictions. This includes the introduction of turnstiles, hand sanitiser stations, PPE and enhanced cleaning of the site.
- General Preliminaries of £23,125.25 included to cover site items such as IT and broadband, First Aid consumables and small plant and tools. A full list of items this allowance covers can be found in Appendix C.
- A risk allowance of £14,160.99, equivalent to 6% included
- OHP was deemed included in the rates, whilst 0.90% was added to the bottom line to allow for Pagabo fees.
- 3.7 Queries were raised with ISG with regard to the additional General Preliminaries within the revised tender and some of the allowances included. This was documented in a schedule which is appended to the report as Appendix C.
- 3.8 Following responses from ISG Fit Out Ltd on the queries the reconciliation exercise was concluded with the tender values unaltered. ISG Fit Out Ltd demonstrated the rationale behind the additional costs and rates were consistent with their original tender.

4.0 RECOMMENDATION AND NEXT STEPS

- 4.1 On the basis of the financial evaluation undertaken in this report, in conjunction with the technical evaluation in the previous Tender Report dated 29 April 2020, it is the recommendation of the project team that **ISG Fit Out Ltd** should be appointed for a Contract Sum of **£5,663,062.00**, excluding VAT.
- 4.2 ISG Fit Out Ltd continue to demonstrate a keen interest in the project being very proactive in querying the Employers Requirements, taking initiative to setup conference calls to discuss Client needs and how best to approach their revised tender bid. Their revised offer is well considered and has been validated by their supply chain as one that is achievable.
- 4.3 In conjunction with the above recommendation and the previous report, Epping Forest District Council need to also consider a number of known residual risks/ issues related to this project, which will need to be mitigated in collaboration with ISG should they be awarded the Building Contract. These risks are outlined as follows:-

Rejection of additional Listed Building Consent – At the time of this report feedback from Historic England and the Senior Conservation Officer from Epping Forest District Council on the second planning consent to recover the entire Civic Building roof with a Sika Liquid Plastic Decothane has proposed that the covering is limited only to where the PV panels are being located. They have asked that the remaining should be left as they are visible from the public highway and should be omitted. The change of scope of the works should this be confirmed needs to be considered.

Timely liaison and consultation with Planning Authority – In addition to fulfilling the obligations set-out within the planning award, there is a requirement to liaise with Epping Forest District Council's Planning Department to have finishes approved before installation on site.

Agreement of contract amendments – At the time of this report, the Contract amendments have not been agreed between ISG and Epping Forest District Council's legal team. Epping Forest District Council have confirmed that they have sought legal advice.

There remains a risk that there could be a delay in a Contract being in place to enable start on site.

Enhanced conditions put in place by Government regarding Covid-19 – Whilst the revised ISG Fit Out Ltd tender considers the impact of COVID-19 on programme and cost, there still remains a risk that government policy towards COVID-19 could change between the time of this report and the start of the project on site with stricter conditions put in place that may impact the Contractor's ability to fulfil its obligations. This could be mitigated with a termination clause in the contract that allows for mutual termination by either party should Covid-19 make it impossible for the project to proceed.

Co-ordination of client led packages – Currently the AV and CCTV package are being designed by specialists appointed by Epping Forest District Council. These designs will need to be co-ordinated with the Contractor's design post contract and could have an impact on cost and programme.

- 4.4 Given that this is a Contract that will follow a Design and Build Procurement route, a large proportion of the risk resides with the Contractor, rather than the Client. However to mitigate residual risk (including risk over and above those listed under item 5.3), we recommend that the revised Construction Contingency set-out within Appendix A of the report, a value of £605,000.00, is fully retained against this Construction Project. It is recommended that this figure be retained against the Project Budget until a full reconciliation of ISG's current Tender Offer has been concluded to consider implications of COVID-19 protocols.
- 4.5 At the time of this report Epping Forest District Council and ISG Fit Out Ltd are in discussions regarding contract amendments. Epping Forest District Council issued proposed amendments and comments on ISG Fit Out Ltd.'s contract qualifications to them on 5 May 2020. ISG are due to meet with their legal advisors on 13 May 2020 with the intention to respond by 15 May 2020.
- 4.6 Discussions should be concluded in a timely fashion and contractual qualifications regarding COVID-19 and contractual mechanisms to recover cost and time should the restrictions become less onerous agreed between both parties.

|----|---|--|---------------------------|--|---|-----------------------------------|----------------------------|
| | Design fees seem low. Please confirm resource allocation and ability to take design on from Stage 3, through to Stage 5 | Our fees include for the completion of the design and services scheduled, brief scope below. We have included for creating new drawings and re- draw/re-badge of Bissett drawings. Included to lead early design meetings with client to gain all sign-offs. Presenting samples for sign off. All roof drawings/design are by the specialist contractor with involvement for some remedial works/abutments associated with new roof work). We have made an allowance for client design meetings. Sub contractor meetings/ site inspections and site | | | Following further discussion and review with Fee providers, an additional 10k sum has been included to ensure all design work and PD fees are covered | Noted | |
| | | sketches/advice. Our Project team would provide support and work on construction drawings once the design is signed-off along with our internal design management. Our MEPH subcontractors have included for the design requirements within their price and are fully capable of providing this service. | | | | | |
| | OHP and Risk Levels. Please confirm you have sufficient risk levels to take on the project and deliver successfully whilst maintaining a margin of profit | Within our tender submission we have considered the risk levels based on the tender information and the conditions of the contract and have allowed sufficient levels of risk accordingly. Our OHP is as highlighted and within the framework range. | | No further action needed | | Noted | |
| 28 | No Schedule of MEP rates has been provided. Please issue | All supply chain submissions have requested SOR, these will be forwarded upon receipt. | | Discussion held and DMH confirmed that this is being followed up on but that it is likely this will not be received until the releavant SC has been confirmed. G+T require this and currently it is showing as non compliant. | SOR's expected to be received this week and will forward on | Noted and we await receipt | Please see attached QSoR's |
| | Please confirm you have allowed programme and cost for the asbestos as advised in the report and any remediation works | We have allowed for an asbestos survey to be carried out on the areas not accessible in the report issued. The areas identified in the report have been included (3 gaskets as non-notifiable items), however any remediation works and the effects of these works as a result of the survey will be treated as a variation. We suggest an 'undefined' prov sum should be included for these works. | | No further action needed | | Noted | |
| | Who is responsible for the MEPH design as no consultant is shown in | The MEPH subcontractor is a full d&b subcontract | | No further action needed | | Noted | |
| 31 | organogram or costs Please confirm who is overseeing the co-ordination between MEPH and Architectural. Are you comfortable you have enough resource to manage this? | agreement. We have included within the management structure for a TSM to manage this coordination. This role is in addition to the general project management role who has overall responsibility for all coordination. | | No further action needed | | Noted | |
| | Organogram doesn't show utilisation of staff. Site based assumed 100%. Please confirm assumption and provide utilisation for visiting staff | Site based staff assumption is correct at 100% non site based staff utilisation is not based on a pure % across the project, but is allocated proportionally in relation to the management required throughout the various stages of the project. We can confirm that the structure and allocations are at the required levels in order to deliver the project works. | | No further action needed | | Noted | |
| | Can you give examples of where a local supply chain has been utilised in your offer | With 96% of our selected supply chain members being located within 15 miles of the EFDC Civic Buildings we have specifically procured with the local spend as a major priority. This 96% is further broken down into 10% within 5 miles, 45% within 10 miles and 41% within 15 miles. | | No further action needed | | Noted | |
| | It would be good to understand who ISG's proposed MEP sub- contractors are likely to be, or if these are intended to be one single company. In addition, would the MEP sub contractor undertake their own design / drawings, or would this be sub- contracted to a specialist design consultant. | As part of our submission we have a comprehensive set of MEPH submissions from the Supply Chain. Whilst we haven't determined the final allocation it is likely to be a separate Mechanical and Electrical procurement but importantly we have tendered this package with SC members who have worked together on a repeat basis and therefore are confident of whichever final choice is made it will be a very collaborative one. All SC members have a mix of internal design capabilities and external consultant usage | | DMH confirmed that the SC are still in competition which was recognised by G+T. DMH confirmed the likely SC to be awarded as Farr (Mech) and AVA (elec). | | Noted | |
| 35 | Have you considered the required electrical pre-start enabling works? | Yes, each of our SC Member submissions are required to include a detailed approach to the logistics and scope of works. This information is reviewed and integrated into our Main Contract approach to the delivery to ensure a 'One Team' approach to the project works. | | No further action needed | | Noted | |

| # QUALIFICATION WITHIN TENDER RETURN | RESPONSE FROM CLIENT TEAM | RESPONSE FROM CONTRACTOR | RESPONSE FROM CLIENT TEAM | RESPONSE FROM CONTRACTOR | | RESPONSE FROM CLIENT TEAM |
|---|---|--|--|--|------------|--|
| Carried forward General | | | | | 117,671.69 | , |
| 1 We have made no allowance for any cost and programme implications | Contractual comments sit with EFDC currently. To be discussed | Noted | | | | Epping confirmed feedback fro |
| resulting from the UK's planned with/farwal from the European Union. Our tender may be subject to supplemental agreement and cost changes. This includes, but is not limited to any taxes, duties, protective tariffs and other charges and restrictions imposed on non-UK companies, goods and nersonnel. | during conference call 16'3 | | | | | commencing 20th April 2020 |
| 2 Whils to ur tender makes no specific allowances for the effects/or implications of the ongoing public health issue, Covid-19 or Coronavirus, we have recognised within our technical submission that this is an ongoing situation that may affect the productivity of the project programme and it is on this basis that we suggest a collaborative discussion is required to be held and that it is likely that a sum of monies should be included as part of the Project Risk Register and held by the Employer to be utilised and instructed as required in order that additional measures can be introduced throughout the project. We would suggest this process is managed under the Change Control process within the main contract. | during conference call 16'3 | Noted | | | | Epping confirmed feedback fr commencing 20th April 2020 |
| 3 We have made no allowance for Electrical and water consumption charges and assumed these are by the client | This is deemed compliant, however please note the following from the prelims; Water use on site is to be monitored by the Contractor via water metering. The Site Manager is to keep records and review water consumption figures regularly; including at possession and completion. Costs to be contra-charged to the Contractor if usage is deemed by the Employer to be excessive. Please confirm you agree | Understanding of 'excessive' is required. Our bid does not include for any costs. | Noted. Contractor to monitor water and should use best endeavours to ensure water consumption is reasonable. No taps / hoses left running etc. | Agreed and confirmed | | Noted |
| 4 We have assumed that listed building consent and approval will be obtained by others. | Listed Building consent aplication is by EFDC. Responsibility for discharging requirements such as the sign off of finishes is by the Contractor. Information for all conditions needs to be provied by the contractor and submitted to EFDC for discharge. Please confirm you understand and agree | enable discharge however responsibility for sign off remains | Responsibility for discharging Listed Building Consent application is Contractor's responsibility and they should manage and co-ordinate the process. This risk should be considered within your costs. Please confirm and advise any uplift | Revised Fees being sought, and confirmation to follow. | 5,000.00 | Please confirm and close out A conditions are not onerous, an finishes |
| Architectural | | | | | | |
| 1 We have made no allowance for spare finishes. | Just a note, the Client has confirmed they wish to have 5 boxes of 20 tiles for maintenance / patch repairs. | Please add £250 for a box of spare tiles. | Client wants 5 boxes, so £1,250.00 to be added for spares | Uplift amended. | 1,250.00 | Noted |
| 2 For the SC-02 timber panelling finish, we have included a provisional sum to make good existing via French polishing only subject to site survey. No allowance has been made for new. | Any existing timber, whether that be the reception desk or panelling will require an allowance for repair and finish as required. A condition survey will determine the extent of this. This will be by a specialist subcontractor and approriate to Listed Buildings | Refer to item 13 in Queries. | | | | |
| We have included a provisional sum for the fire rated glazed sliding door pending receipt of a compliant quote. | Please provide firm price for the glazed sliding door | Refer to item 11 in Queries. | | | | |
| We have assumed the structural calcs for the Rooflight and Sliding Folding Walls have | No survey has been done to the rooflights. Contractor to undertake | Please allow fees of £4,750.00 for the appointment of a | £7,500.00 added for structural fees under #36 of queries. Confirm | Please remove £4,750 as this appears to be a | | Noted |
| been carried out and the building can carry these loads. | necessary steps to ensure solution proposed is suitable. This was relayed at site visits and mid-tender and pinpointed as a critical path item. Tender Addendum #3 issued as built information on existing rooflights. Please allow for structural input to inform your design. Contractor will be responsible for delivering this element of work | structural engineer to undertake a survey/calculations of existing structural integrity of the rooflight housing area. | this supersedes the £4,750 and is not £4,750.00 + £7,500.00 | duplication to item 36 of Queries. | | |
| We have assumed the existing raised floor can be reused in its entirety and have not included for any replacement pedestals or tiles. | Noted | | | | | |
| We have not made any allowance for acoustic barriers to the floor void, should these be required, this would be at an additional cost. | Noted | | | | | |
| Should underlay and adhesive need removing following strip out of the existing floor finishes, this would be an extra over cost of £7/m2 | Pricing document refers stripout to allow for underlay and adhesive. Please confirm cost for all inclusive scope. | Please add 4604m2 x £7/m2 = £32,228.00 | Noted | | 32,228.00 | |
| Should the strip out need to be carried out outside normal working hours, this would be an additional cost of £44,282.44. | Prelims provide working hours as set by Listed Building consent. Contractor to allow sufficient time in programme for stripout. Please confirm | We can carry out all strip out works during normal working hours 8am-6pm Monday - Friday and 8am-1pm Saturday. | Noted | | | |
| The specification for the partitions is based on; 70 C Stud including 25mm insulation, 1 x 12.5mm Plasterboard each side, tape and Joint both sides. Allowed average 3m height as floor heights vary | Partitions should be as specified: Gypframe 48 S 50 'C' stud 2 Layers of 12.5mm Gyproc Soundbloc on both sides 25mm Isover Acoustic Partition Roll (APR 1200). Please confirm rate for compliant partitions | | | | 7,617.60 | |
| 0 Making good existing walls is based on a provisional quantity subject to survey following the strip out. The rate included is for minor repairs only ie filling holes and minor spot replacements. | Noted | | | | | |
| 1 The specification for the suspended plasterboard ceiling is based on; MF, 1 x 12.5mm Plasterboard, tape and joint. Access panels by Profab 600 x 600 | New plasterboard ceiling is to match existing in accordance with listed building consent. | Noted. | Noted | | | |
| 2 The extra over for 6mm ply substrate to vinyl floor finishes is £17/m2. This is not included within the tender. | Noted | | | | | |
| 3 The extra over for 12mm ply substrate to timber floor finishes is £25/m2. This is not included within the tender. | Noted | | | | | |
| 4 The extra over for waterproofing to the wall tiling is listed below. This is not included within the tender. | | Should waterproofing be required, please refer to the provided schedule of items and costs. | Noted | | | |
| We have not included for decorations to the existing radiators, pipework, window cills etc. | | Window cills are french polished therefore we believe no paint finish is required. The radiators are all being replaced for new, please confirm that paint is required. We would like to add a further £1,750 to allow for painting all visable new/existing pipework. | Noted | | 1,750.00 | |
| The atrium cannot be cleaned using a nebulous spray as described on the drawing. A the location is internal, water discharge is not containable. We have therefore allowed for a mixture of steam and hand clean to the areas, using a mild alkaline detergent. | Nebulous approach. The approach you suggest does not sound appropriate for a listed building and we would therefore want to see verification by a specialist that this will not damage the fabric of the | area, still consider the Nebulous system not advisable. We | ISG need to ensure they are using a cleaning system appropriate for the listed building. In my experience there are generally 2 options for listed buildings; Nebulous or Steam cleaning as these are both non evasive. We will review if there are any other appropriate methods but suggest one of these are cited for the moment. We propose that a workshop / demonstration is provided to show the proposed solution is suitable. Should this not be the case, ISG are responsible for providing the nebulous apporach as per the ERs | | 5,000.00 | Noted and agreed |

IS that sufficient, especially given procurement activities overlap from Day-12 How will the placing of early orders and completion of design be managed/ coordinated? Can we have a clear, concise date for each trade package #'s 17-33 for when a design is frozen and order is placed. Currently unclear. Especially important to know for key procurement items. #36 states 'works completed by others' and shows elements that are not stated in prelims as by 'client/ others', what activities does this cover? Q4 - #36 states 'works completed by others' and shows elements that are not stated in prelims as by 'client/ others', so what does this mean and is this non-compliant. Section 3 is shown as commencing earlier than Section 2 completing? IS this possible? My interpretation was that scope of Section 3 remained live, operational | | view based on our review of the competion works required. The procurement strategy is based on a progressive delivery and indeed early engagement of the key supply chain and early validation of existing design and services. This is shown in the Pre Construction programme that was included in the tender submission. The dates are also included in the attached document - EFDC Schedule of design & approval dates The decant scope has been attached that is mentioned in the clarifications. On the programme I have included a milestone as this is clearly a client activity to be undertaken prior to possession of site. The list is as per the attached document. The only reason I can see confusion is because they are looking at the Strategic programme which shows the detail rolled up. Hen exit items on the Strategic Programme are our activities also rolled up. Refer to item 3 above See revised programme rev 1 attached which shows Section 3 after Section 2 fit out. The PC date is not changed. There are examples of areas that have to remain live throughout like the Comms room etc, this has been allowed for with the provision of a temporary power supply etc. The only area that requires Public Access is the temp reception in the Ground Floor of Section 3. This starts after Section 2 completes so a provision could be allowed in the newly | Noted Noted Noted Rev 02 attached. Assume this is the correct programme? | Confirmed | | Noted | |
| Wireless Access Devices Programme Six weeks for completion of Stage 4 Design activities.
