

## EFDC SCI consultation Q12

Name	12.Do you understand the process of commenting on planning application consultations as described in the document? If no, what part(s) in particular?
K A Miller	A town planning booklet showing the typical questions and answers for aggrieved neighbours would help them decide how to go about writing their complaints
Mrs K G Freeman	I would like to make planning applications posted to myself and all the other local residents!! Affected by developments with a reply questionnaire so we can post it back to you saying clearly what we want and that is no building of housing estates in North Weald Bassett green belt VILLAGE!!! build houses somewhere else we don't want them!!!
Mr William Freeman	I would like to have planning applications posted to myself and all the other local residents affected by these developments with a reply form so we can post it back to the EFDC etc saying clearly that we don't want any building in any Green Belt land agricultural or any other type!!!
Alisa Jones	I think so, although this document just isn't user friendly
Mrs Valerie Mavin	I would like to have planning applications posted to myself and all the other local residents affected by developments with a reply questionnaires so we can post it back to EFDC etc saying clearly that we don't want any building on any Green Belt agricultural crop growing (working) land of any type!!!
Barbara Seal	but you need to know details where to obtain documents and meetings should not have to depend on local action group. No reduction of the time for <u>planning</u> documents to be open for comment
Mr & Mrs Walker	uncertain as it was too technical
Edie Bow (Chairman) Chigwell Residents Association	web site no use in locating the issues
Mrs Val Evans Epping Upland Parish Council	However, could be clearer about representations as this is covered in paragraph 4 but appears to be part of 'How to respond to consultations'. Would suggest that this is repeated again in the Planning Applications section as a separate subsection or part of paragraph 45. Improved indexing/ navigation on EFDC's website to give easier/ quicker access to response areas. Arrangements need to be in place for: 1) those who suffer from disabilities and 2) written responses continue to be allowed until there is proper internet access in all areas- in some rural areas internet access is either limited or very poor where slow dial -up is still the only facility.

## EFDC SCI consultation Q12

Mrs Lisa Berry  
& Mrs A  
McCarthy

we had to go to the planning office (who were very helpful) to seek advice to complete questionnaire.
